

## **Need Training for Combined Cycle Power Plants?**

**TTP Provides Innovative Training through the Visual Presentation of Technical Information**

**Now Offering: Combined Cycle Overview Courses**

**[Click Here for 3D Animated Demo](#)**

This is our most popular course for:

- New Operators and Maintenance Personnel training for CC Process Familiarization
- Existing Operators, Maintenance Personnel and Supervisors transitioning from coal fired plants to Combined Cycle Plants
- Upper Level Managers and Engineers
- Others who need a high-level training course without detailed equipment operation instruction

This course has been purchased by large Engineering Firms, Equipment Manufacturers and Utilities both in the U.S. and throughout the world. The course contains about 3 hours of e-learning content as well 72 minutes of detailed animation of engineering models presented in 33 videos for CT, HRSG and ST design and flowpaths.

## **We Also Offer Products For Those Needing More Detailed Training**

Technical Training Professionals (TTP) offers a number of training products for Combined Cycle Power Plants. Our courses range from customized detailed operation courses to generic Combined Cycle Overview Courses.

**[Click here for samples of our Detailed CC Animations and E-learning Course](#)**

I have attached several items which include:

1. CC Course Brochure - contains links to sample animations, sample e-learning content and detailed content outlines
2. CC Course Pricelist - we provide three options for purchase: Single User DVD/CD, Corporate License for Company Network and Course Hosted on TTP LMS site

We can also create site-specific operator training courses which feature site-specific control screens and models, with English or other languages.

Also, we can create similar content for Coal Fired Plants, especially for Flue Gas Desulphurization Upgrades.

Please let me know if you have any questions. TTP is ready to provide the training solutions your company needs.
